

Environment Policy

Policy Statement:

Beagle Engineering Ltd acknowledges that its manufacturing processes could have a potential affect on the environment & therefore recognise its responsibility & obligation to preventing pollution & to minimise any impact.

Commitment:

The management is committed to:

- Reviewing & understanding the current & potential impact of our activities, products & services on the environment
- Complying with all applicable & relevant environmental laws, regulations & codes of practice
- Ensuring this Policy is understood, implemented & maintained at all levels in the organisation
- Raising environmental awareness for all employees, encouraging involvement & giving support through suitable education & training in environmental matters as required
- Reducing pollution, optimise recycling & using energy & natural resources more efficiently
- Monitoring & continually improving the activities impacting on the environment & the performance of the internal Environmental Management System
- Openly communicating our progress in reducing environmental impact to interested internal & external parties & responding appropriately to reasonable requests for information
